Summary

Job Title	Senior Project Manager
Job Type	Full-time ongoing
Location	Bruce, ACT office location, some provision for remote work
Reports to	General Manager Operations
Remuneration	Salary plus superannuation, ESOP and other benefits

Company background

Castlepoint is a disruptive solution that provides command, control, and compliance over all information, in every system, through a single pane of glass. Castlepoint reads, registers, classifies, and manages information from all systems in a network, using Artificial Intelligence.

Castlepoint Systems is dedicated to ensuring that our operations are conducted ethically, in accordance with applicable laws and best practices, and in the best interests of our clients, our community, and the environment. Our vision is to make the world a better place by changing the way organisations manage information, so that people, communities, and companies are safer and smarter.

We have committed to becoming an employer of choice, one that attracts likeminded, hardworking people through flexibility and other real, developmental benefits that improve the lives of our staff. We are a feminist company, and believe strongly in supporting men and women to take equal roles in the workplace and at home. We enforce pay equity, and pay superannuation throughout parental leave. We seek to employ people who represent community demographics, including younger and older people, indigenous people, migrants, people with a disability, and LGBTQIA+ people. We also provide a fantastic working environment, with meals provided, sit/stand desks for all staff, modern equipment, free parking, multiple work spaces (including outdoor), in a leafy and accessible central location.

To help ensure that our employees can enjoy a high standard of living, we aim to pay above the market rate for their skills, qualifications, and experience level. We then invest heavily in our people with formal Development Plans, reviewed twice-yearly, committing to internal mentoring, paid training, and other development opportunities with a goal of continually increasing their marketability. As employee skills increase, we assign more responsibilities, and we then adjust their wages and titles upwards commensurately. We also support employees to develop skills and experience in areas not directly related to their roles if they have an interest in those types of development. We have a policy of salary transparency for all employees, including the Executive, to help combat unconscious bias and foster gender equality.

Castlepoint also supports our employees with an Employee Assistance Plan, and skilled HR professionals with experience in mental health and workplace cohesion. We support our staff to practice religious and cultural observance during work time using flexible working arrangements, and to be free of discrimination based on their beliefs. We encourage communication between all areas of the business, and provide regular updates from the executive team on company activities and initiatives. Our culture is genuinely supportive, and employee satisfaction is extremely high.

Position Overview

Primary purpose of the position

The Senior Project Manager is responsible for the project management of our largest and most complex clients, including large government departments, banks, and other regulated entities. Success in this role requires a strong and proven discipline in project management methodology, as we are company with a significant focus on accountability, integrity, and compliance.

Managing projects in accordance with our controls and standards is vital for our client base, so the role requires someone who is good at producing high quality documentation and accurate reporting. But this senior role also requires creativity. You will need to be imaginative, and have enough learned experience to see patterns and potential opportunities for faster delivery, augmented benefits, and smoother communications between disparate stakeholders.

Our projects relate predominantly to the implementation of our cutting-edge Artificial Intelligence technology for our clients. These clients include Federal, State, Local, and international governments, large commercial organisations, universities, and other technology vendors. The Senior PM role has a wide range of contact with stakeholders at all levels of seniority and technical background, in Australia and overseas, and interpersonal skills are very important.

Part of your day-to-day will be mentoring the other members of the project team, and engaging directly with the Executive to plan and strategize. You will also assist the Growth team in forecasting and scoping future projects, and bring your experience to bear as you contribute to our continuous improvement model for our procedures and policies.

Key Challenges

The company is growing extremely quickly, and demand from new clients and partners is very high. New implementations are frequent, and clients rely on the system for many key business activities. The cadence of new engagements keeps the working environment busy, with competing demands. It is vital to have a strong grasp of time and resource management, a proactive communication style, and great organisation skills.

Ideally, you will have some government experience, and a security clearance at Baseline or above. This is not an essential requirement, but a large proportion of our client base is Federal Government. It will help to have some experience working with this type of customer, and within its constraints.

Duties and Responsibilities

Responsibility	Breakdown of Tasks	Outcomes/Measures
Manage project activities 90% time/effort	<ul style="list-style-type: none"> • Prepare project plans • Prepare schedule • Oversee contractuals • Ensure resources are managed effectively • Maintain: <ul style="list-style-type: none"> ○ Project logs 	<ul style="list-style-type: none"> • Project documents and tasks are completed in accordance with controls. • The agreed project management methods,
